

Xinet Retail Pricing for FlashNet Modules

Developed by Software Generation Ltd. (SGL), and distributed by Xinet®, FlashNet software is the backend archiving product required to run WebNative Archive in Unix environments.

FlashNet Jukebox Modules

Jukebox modules allow the FlashNet server to control a specific number of storage devices. A license for a single 40-slot, 2-drive Jukebox Module is distributed with each new purchase of WebNative Archive.

Additional Jukebox Modules can be added to the system as follows:

- up to 8 slots and 1 drive \$1,670
- up to 12 slots and 1 drive \$2,670
- up to 20 slots and 2 drives \$4,000
- up to 40 slots and 2 drives \$5,340
- up to 80 slots and 2 drives \$7,565
- up to 120 slots and 4 drives \$9,790
- up to 250 slots and 4 drives \$12,015
- up to 500 slots and 6 drives \$14,685
- over 500 slots and 6 drives \$17,355

FlashNet Server Software

A license for FlashNet server software is distributed with each new purchase of WebNative Archive.

Licenses for FlashNet back-up of additional servers are also available, as follows:

- FlashNet for single server: \$2,500.00

FlashNet for High-speed Devices

When high-speed devices are used, such as Ampex, Sony DTF, S-AIT and STK-9x40, high-speed support is required. For currently supported devices, contact SGL.

- FlashNet for High-speed Devices \$6,675

Jukebox Drive

Additional drives can be purchased, as follows:

- Jukebox Drive (per drive) \$ 890

Jukebox Slot

Additional slots can be purchased, as follows:

- Jukebox Slot (per slot) \$ 100

For full details about extra slot allowances and restrictions, please contact us at orders@xinet.com.
